General query - Simon Chikhladze Georgia

To the Amnesty International Research and Documentation Team,

I am writing to formally submit a dossier regarding systematic human-rights abuses and life-threatening activities at a specific facility in Tbilisi, Georgia, which operates outside the oversight of national law.

1. Context of the Security Operation
I am a Georgian national with documented lawful residence in the U.S. (1990–1998). Since my return to Georgia, I have been treated as a target of an ongoing counterintelligence-style operation. This operation has involved forced deportation via EU-coordination (Frontex-linked charters) and the utilization of "safe-country" status to bypass human-rights scrutiny.

2. The 38 Mitskevich Street Facility
Current operations at 38 Mitskevich Street, Tbilisi, involve a mixed network of actors (including individuals linked to Turkish and Azerbaijani security interests) operating under the cover of Georgian-passport-facade-logic and municipal-authority-backing.

3. Specific Life-Threatening Allegation
I am providing documented information regarding a direct death-threat against my sister, Keti. The individuals involved include:
* **"Julia" (Pseudonym)**: A Turkish-linked actor using Georgian-passport-status to operate with impunity.
* **Zaza Kaladze**: A documented operative at the same address.
* **Irakli Kordzakhia**: The manager of the facility, affiliated with Azerbaijani police interests, operating under the cover of the Tbilisi Municipal Inspection.

4. Requested Action
I am submitting this dossier for your research and documentation files. I request that:
* This case be recorded as part of your pattern-analysis on "extra-legal" security-service operations in Georgia.
* This information be cross-referenced with your ongoing monitoring of human-rights violations in the country.

Respectfully,

Simon Chikhladze
